

Christian Health Education Ministry invites you to learn the principles and techniques for analyzing the Body Chemistry using the Reams Biological Theory of Ionization. The RBTI is a mathematical equation that can predict a loss of energy and consistently trace results in the body to a state of wellness. The data in the equation is obtained from an analysis of urine and saliva specimen. You will, regardless of which health program you follow be able to tell whether you are gaining energy and getting well or losing energy and getting sicker. Through its unique program it allows one to gain energy at the fastest rate for the age and get well quickly.

## STUDENTS

This course is designed for anyone seeking an accurate method for helping themselves, patients, or their family, to reach better health through optimum Nutrition.

- Fathers
- House wives
- Medical Missionaries
- Nurses
- D.C., MD,ND

## SCOPE

This course is an in depth study of the principles and application of the Reams Biological Theory of Ionization. It includes energy calculations, explanations, evaluations and interpretations of the factors in the equation. You will understand how each factor relates to: each other;

### 6 Factors

1. Sugars
2. Urine pH
3. Saliva pH
4. Salts
5. Albumen
6. Urea.

mineral, vitamin and enzyme deficiencies; organ and tissue function and deterioration; ones true state of health and the true cause of illness.

It shows how the violation of health laws result in faulty body chemistry, the root cause of all diseases. The Student will be able to use the acquired knowledge to designed and recommend the most complete nutritional and wellness programs for the prevention and correction of nutritional imbalances. Upon completion of this HCC you will have a thorough working knowledge of how to use this vital information in your life on a daily basis.

### Covers

1. Supplements
2. Lifestyle
3. Juices
4. Disease
5. Nutrition
6. Health Laws

As a Home Correspondent Student, you will learn at your own pace. When you have successfully completed this Course on the Biological Theory of Ionization principles, you will become a Certified Body Chemistry Analyst.

## COURSE MATERIALS:

13-DVD & Study Manual by Nathaniel Lewis, CNC and Cossil Lewis, ND, CNC

**Tuition: \$499.00 + \$15.00 shipping**

This course includes seven tests and a final exam. To successfully complete this course, the student must score 85% or higher on each test/final exam. This will prove that the student understands the material well enough in order to receive Certification from CHEM.

## LAB EQUIPMENT

If one is to seriously pursue the understanding and application of the RBTI principles, access to lab testing equipment is a necessity and may be purchase at anytime during your study. Purchasing information is included in the study manual.

## INSTRUCTORS

Nathaniel and Dr. Cossil Lewis received thorough training in the RBTI from those who have pioneered this science. They have also been trained by Medical Practitioners and other health professionals in other natural health sciences and practices.

Nathaniel and Dr. Cossil Lewis have spent many years in Clinical Nutrition. Part of this time they worked for a Medical Facility doing the analysis in Cookeville, Tennessee. During their years of service they have used the RBTI principles as the exclusive method for determining the individual body chemistry needs and making recommendations for persons who have sought their services.

They are currently the directors of Better Living Retreat; operate a Health Food Store (Better Living Natural Foods), hosts for the Better Living Radio program where they attempt to educate the

community on natural health and lifestyle principles, while they continue to work with clients. They enjoy working in the Retreat, helping the sick to find their way back to health and wellness.

CHEM's Home Correspondent Course is a thorough presentation of the straight original, undiluted Reams Biological Theory of Ionization principles that have withstood many critics from its earliest beginnings.

**We accept all Major Credit Cards.**

These tests measure the results of lifestyle habits, showing the fruits of obedience or disobedience to the health laws. Knowing the chemistry allows one to plan a program that is best suited for each person, producing results at the fastest rate for the age.

**Students' comments on the live Seminar:**

*"I really learnt a lot...It verify what Dr Reams has said; Nathaniel is saying the exact same thing." W.L.-GA*  
*"This is the finest information that is available on detecting your health status." V.P.-WA*  
*"It has been my real pleasure to have been with you and I do believe that it was the best meeting of my career." W.K.-TN*  
*"I feel that it is necessary especially as Medical Missionaries. We will be able to make ... more accurate adjustments in their programs."*  
*"This is truly and answer to prayer."*  
*"This is the clearest that I have heard this material presented."*  
*"The material was very well and very thoroughly presented."*

**Home Correspondence students' comments:**

*"This course is exactly what I was looking for." G.A.-WI*  
*"I'm enjoying the course tremendously and with eagerness I hope to finish." L.Z.-CA*  
*"I thought I understood the material until I started doing this course." M.P.-NY*  
*"This course helped me to understand the book 'Choose Life or Death' a whole lot better." J.T. -IL*
